

C-THR3

## C-THR3 Screen Specifications

C-THR3 screens have a thickness of 31mm.

The screen panel is constructed using foam-backed fabric standard to both faces.

The screen is constructed of aluminium extrusions as a structural means of screen to screen connection.

The simple means of linking allows ease of connection even when screen heights differ.

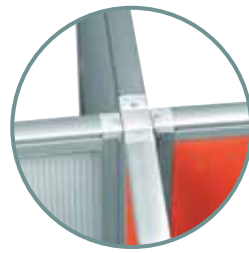

Aluminium trims are anodised.

### PRODUCT

C-THR3 screen range is both stylish and functional, and will work with any product to become an intrinsic part of any furniture system.
